

# Step 1

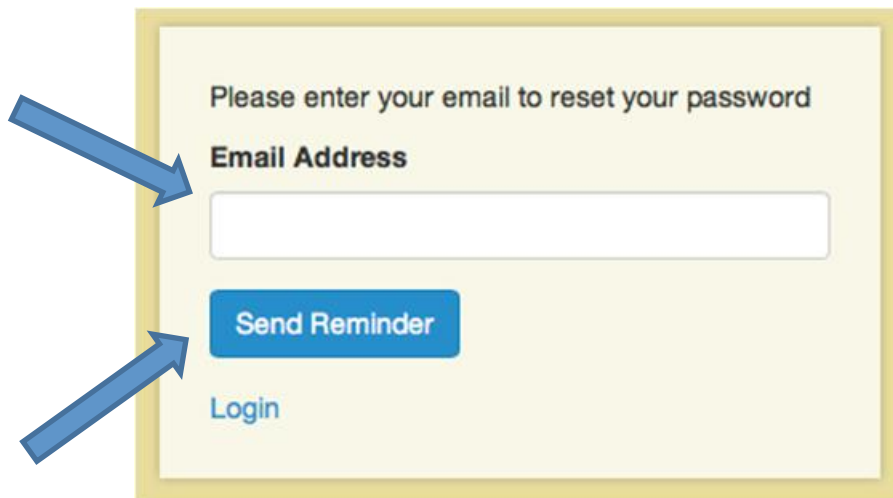

Go to our new ad slick database website where you will find a form similar to the picture below.

The image shows a login form with a light yellow background. It contains two input fields: 'Email Address' and 'Password', each with a small icon of a person and a plus sign to its right. Below the fields is a blue 'Login' button. Underneath the button are two links: 'Forgot Password? Reset it here.' and 'Need a login? Register here.'. A blue arrow points from the left towards the 'Forgot Password?' link.

Click on the “Forgot Password?” link which will open up another form for you to view. See Step 2 for your next instructions.

# Step 2

Please enter your email to reset your password

**Email Address**

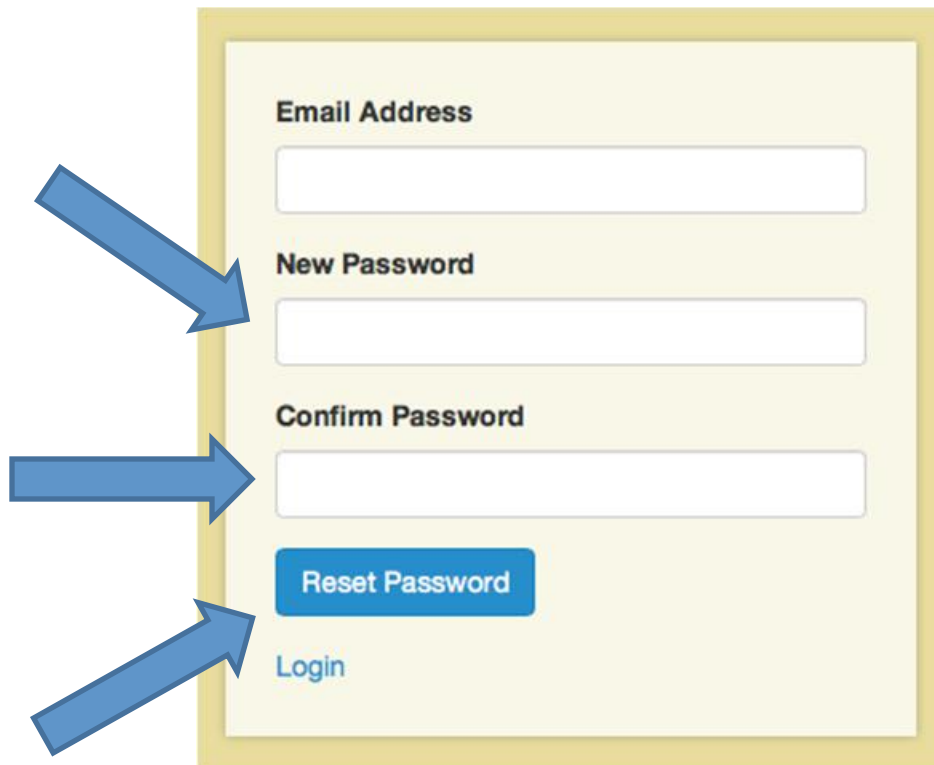

**Send Reminder**

[Login](#)

Enter the email address you have been using for our old ad slick database so that our system will recognize that you are an authenticated ad slick database user.

Next, click the “Send Reminder” button after you have entered your correct email address. An email will be automatically sent to this address with a link to reset your password. Click on this link and see Step 3 for your final instructions.

# Step 3

The image shows a password reset form with the following elements:

- Email Address**: A text input field.
- New Password**: A text input field, highlighted by a blue arrow.
- Confirm Password**: A text input field, highlighted by a blue arrow.
- Reset Password**: A blue button, highlighted by a blue arrow.
- Login**: A blue link below the button.

Now you will re-enter the same email address you used during Step 2 and enter your desired password into the “New Password” and “Confirm Password” boxes. After you have entered your desired password in both boxes, click on the “Reset Password” button.

You are now finished with resetting your password and you can use the same email address and password you just created to officially login to our new ad slick database.
